U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application Number: 09/804,408 Page 2

Art Unit: 1651

5

The amendment of 2/10/03 amended claims 34 and 36, and added claims 38-43.

Claims examined on the merits are 1-28 and 34-43 which are all claims in the application.

Applicants state that a Supplemental IDS and Form 1449 was filed August 19, 2002, and have supplied a copy of the 1449 and of a return postcard from the Patent and Trademark office showing a filing date of 8/19/02. However, the application does not contain the Supplement IDS, and the IDS did not reach the application file. The documents listed on form 1449 of the IDS should be resupplied.

Claim Rejections - 35 USC § 103

Claims 1-28 and 34-43 are rejected under 35-U.S.C. 103(a) as being unpatentable over Ogle et al (5,958,669) in view of Yang et al (5,935,168) for reasons in the previous office action of 10/2/02 and for reasons herein.

The claims are drawn to tissue containing linkers bonded to tissue and bridge molecules bonded between two or more of the linkers, and to a method of crosslinking tissue to prepare the tissue having linkers and bridge molecules, or to tissue containing modified sites having bridge molecules bonded to two or more of the modified sites, and to a method of crosslinking tissue to prepare the tissue having modified sites and bridge molecules.

Ogle et al disclose crosslinking tissue to fix tissue by reacting the tissue with glutaraldehyde.

Application Number: 09/804,408 Page 3

Art Unit: 1651

Yang et al disclose crosslinking tissue with glutaraldehyde, and then reacting with a diamine followed by reacting with additional glutaraldehyde (col 1, line 43 and claims 8-10).

After reacting with glutaraldehyde as disclosed by Ogle et al, it would have been obvious to react with a diamine and then with additional glutaraldehyde as suggested by Yang et al. Bridges as required by the present claims will inherently result.

Response to Arguments

Applicant's arguments filed 2/10/03 have been fully considered but they are not persuasive.

Applicants urge that in Ogle et al and Yang et al, the tissue is crosslinked with glutaraldehyde, and there is no coupling of one end of glutaraldehyde to a bridge molecule. However, all glutaraldehyde will not contain both ends bound to tissue when crosslinking occurs in Ogle et 15 al and Yang et al, and when the diamine is added there will be some free ends of the glutaraldehyde that will react with an amine of the diamines. In an embodiment of the present invention, the present specification discloses (page 24, lines 21-22) that the linker and bridge molecule can be applied to the tissue sequentially. If both ends of glutaraldehyde 20 react with tissue as asserted by applicants, then this embodiment will not work since the tissue is contacted with the glutaraldehyde in the absence of the bridge molecule as in Ogle et al and Yang et al. that this sequential embodiment works supports that some free aldehyde groups will remain after crosslinking tissue with glutaraldehyde as disclosed by Olgle et al and Yang et al. Furthermore, Yang et al in a 25

15

20

final step reacts the tissue with glutaraldehyde after reacting with a diamine. This will result in the diamine being the linker and the glutaraldehyde being the bridge molecule which will have one end coupled to an amine of a diamine bound to tissue and the other end coupled to an amine of another diamine bound to tissue. The conditions of dependent claims would have been obvious matters of choice in view of the disclosures of the references, and no result is seem from the conditions of these claims that would have been unexpected from that obtained when performing the invention of the independent claims.

10 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened-statutory-period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Naff whose telephone number is (703) 308-0520. The examiner can normally be reached on

Application Number: 09/804,408

Art Unit: 1651

Page 5

Monday-Thursday and every other Friday from about 8:30 AM to about 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, a message can be left on voice mail.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn, can be reached at telephone number (703) 308-4743.

The fax phone number is (703) 872-9306 before final rejection or (703) 872-9307 after final rejection.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
